EDUCATION

International University of Rabat

Rabat, Morocco

Masters in Software Engineering

Expected Graduation, Jun 2026

- Curriculum focused on software development, distributed systems, database management, and innovative application design.

PROFESSIONAL EXPERIENCE AND ACADEMIC PROJECTS

Multi Global Trade

Personal Project

Nov 2024 - Dec 2025

- Development of a website for a company specializing in the import of marble and sanitary products. This project strengthened my skills in user interface design, dynamic content integration, and user experience optimization for better product and service presentation.

International University of Rabat

Service Application (Integrated Project)

Nov 2024 - Jan 2025

- Design and development of a services application built with Flutter (frontend in Dart) and Supabase (database). This project enhanced my skills in mobile development, database management, API integration, application architecture, and collaborative work.

Tetrasys

Activity Application (Internship)

June 2024 - July 2024

- Design and development of an innovative application enabling users to create and join activities organized by themselves or other members. This project focused on user experience with an ergonomic interface and optimized interactions through real-time data management.

OsiSoftware

E-Commerce Website (Internship)

July 2023 - Aug 2023

- Creation of a comprehensive e-commerce platform where users can browse, select, and purchase products. This project involved setting up a product management system, an intuitive user interface, and secure payment methods, ensuring a seamless and optimal experience.

International University of Rabat

Dental Clinic Management Application (Integrated Project)

Sep 2022 - Jan 2023

- Development of a complete application as part of an academic project aimed at facilitating dental clinic management. The application allowed for creating and managing patient and administrator accounts while organizing appointments.
